### What is Aviator?

Aviator is a social multiplayer crash game. The core concept is deceptively simple: an aircraft takes off, and as it ascends, a multiplier boosts. Gamers place one or 2 bets before the round begins and must hit the "Cash Out" button before the airplane flies away. If they cash out successfully, they win their bet multiplied by the present coefficient. If the plane flies away (crashes) before they squander, the bet is lost.

Unlike standard slots where the outcome is determined entirely behind the scenes by a Random Number Generator (RNG) spinning invisible reels, Aviator puts the element of timing directly into the gamer's hands.

### Key Features of Aviator

- **Provably Fair Technology:** Players can confirm the fairness of each and every single round.
- **In-Game Chat:** An integrated chat function enables players to communicate, share big wins, and interact socially.

2. **Watch the Plane Take Off:** Once the round starts, the red plane removes, and the multiplier starts ticking up from 1.00 x. It can theoretically increase to infinity, though in practice, it crashes at differing times.

3. **Squander:** This is the most turning point. Click the "Cash Out" button before the plane flies away to protect your profits.

## Popular Aviator Strategies and Tactics

- **The Low-Risk/ Conservative Strategy:**

- *How it works:* Players established Auto Cash Out at low multipliers, such as 1.20 x to 1.50 x, and place smaller bets.
- *Objective:* To achieve frequent, small wins that progressively build the bankroll. The disadvantage is that a single unforeseen 1.00 x crash (where the plane flies away immediately) can clean out a number of previous gains.

- **The Dual-Bet Strategy:**

- *How it works:* Players place 2 bets at the same time. The very first bet is set to auto-cash out at a moderate multiplier (e.g., 2.00 x) to protect a profit or break even. The 2nd bet is delegated run manually for a higher, riskier multiplier (e.g., 10x or greater).
- *Goal:* Balancing safety with the excitement of going after a huge payment.

- **The Martingale System (Use with Caution):**

- *How it works:* Doubling the bet after every loss, with the objective of recuperating all previous losses plus an earnings when a win lastly happens.
- *Goal:* Mathematically recovering losses, though this requires a really big bankroll and can rapidly strike table limitations.
