What is Crazy Time?

Released in July 2020, *Crazy Time* is a live dealer online video game reveal developed around a huge, brilliantly colored 52-segment wheel. Hosted by charismatic presenters who sing, joke, and connect with players via live chat, the game combines the simplicity of carnival-style betting with modern RNG (Random Number Generator) components and reward rounds that look like computer game.

Unlike basic gambling establishment games where players bet your house in seclusion, *Crazy Time* cultivates a communal environment. Thousands of gamers from around the world can position bets on the same result, cheering together when a major benefit round hits.

Understanding the Game Mechanics and Wheel Segments

The primary goal of *Crazy Time* is simple: gamers should properly predict which section the wheel will stop on after the presenter provides it a spin. The [bet crazy time real money](#) wheel is divided into 8 different outcomes, consisting of numbers (1, 2, 5, and 10) and 4 unique bonus offer rounds.

The Wheel Breakdown

Outcome/ Bet Type	Variety of Segments on Wheel	Payment Odds	Approximate Probability
Number 1	21	1:1	40.38%
Number 2	13	2:1	25.00%
Number 5	7	5:1	13.46%
Number 10	4	10:1	7.69%

Note: The remaining sector space on the wheel (making up the 52 overall) is tied straight to the Top Slot multiplier mechanics.

The Top Slot Feature

Before each and every single spin of the main wheel, a secondary two-reel slot device situated straight above the wheel spins concurrently.

- **Reel 1** display screens one of the wagering sections (numbers or bonus offer games).

- **Reel 2** display screens a random multiplier varying from **2x as much as 50x**.

If the sign on Reel 1 lines up horizontally with the multiplier on Reel 2, that multiplier is used to that particular bet. If the wheel arrive on that result, any winning bets for that section are increased accordingly. If a multiplier arrive on a benefit game, the multiplier applies to all values inside that bonus round, setting the phase for potentially astronomical payouts.

Dive Into the Four Bonus Rounds

The real magic-- and the greatest prospective payouts-- of *Crazy Time* lie within its 4 reward video games. Setting off among these rounds transfers gamers from the main studio into a high-production augmented truth or physical set.

1. Coin Flip

- **Frequency:** 4 sectors on the wheel.
- **How it works:** A simple red and blue coin is turned by an automated machine. Before the flip, each side of the coin is designated a random multiplier by the system. Whichever color lands face up identifies the winning multiplier for all gamers who bank on Coin Flip. If the multipliers are extremely low, a "Rescue Flip" can in some cases be set off for another opportunity.

2. Cash Hunt

- **Frequency:** 2 segments on the wheel.
- **How it works:** Players face a massive virtual screen including a gallery of 108 random multipliers hidden behind shooting targets (such as a cactus, a chef's hat, or a target). A countdown timer begins, and each gamer needs to utilize their cursor (or touchscreen) to aim and fire a cannon at a target of their choice. When time expires, all cannons fire, exposing the individual multipliers behind the chosen targets.

3. Pachinko

- **Frequency:** 2 sectors on the wheel.
- **How it works:** Inspired by the standard Japanese arcade video game, this bonus round features a massive physical Pachinko wall filled with pegs. The host drops a radiant puck from the top of the board. As the puck cascades downward, bouncing off the pegs, it ultimately lands in one of the slots at the bottom, which shows a multiplier. If the puck lands in a **"DOUBLE"** slot, all multipliers at the bottom of the wall double, and the host drops the puck again for even larger prizes.

4. Crazy Time

- **Frequency:** 1 sector on the wheel.
- **How it works:** The ultimate benefit round. The host opens a red door, leading gamers into a vibrant, whimsical virtual world dominated by a huge virtual wheel containing 64 sectors and three flappers (Green, Blue, and Yellow).
- **The Process:**
 1. Players choose among the 3 flappers (Green, Blue, or Yellow) before the wheel is spun.
 2. The presenter presses a huge red button to spin the massive wheel.
 3. When the wheel stops, the multiplier shown by the player's selected flapper is awarded.

4. If the flapper points to a "**DOUBLE**" or "**TRIPLE**" segment, all multipliers on the wheel double or triple, and the wheel spins once again-- up to an optimum cap of **20,000 x**.
