1. **The Veto Process:** Who is selecting and prohibiting? If a team is forced to play a map they traditionally prevent, their win likelihood drops considerably.
2. **Recent Map History:** Use platforms like HLTV to see the last 10 matches of both teams on the particular map being played.

Consider Team Momentum and Roster Changes

Counter-Strike is extremely momentum-based. A team that has simply ended up a tournament run is typically "hot," while a team returning from a month-long break might struggle with "rust." Furthermore, keep a close watch on stand-ins. Even the world's finest teams struggle when they change a core player with a momentary substitute.

The Importance of Bankroll Management

- **Overlooking the "Underdog" Potential:** In CS2, the skill gap between the leading 10 and the top 20 groups is narrower than ever. Do not presume the favorite will win 100% of the time, particularly in "Best-of-1" formats where variation is high.
- **Over-relying on Hype:** Just since a lineup is made from "star gamers" doesn't suggest they have good chemistry. Synergy and interaction typically beat raw objective.
