

Every shipment a business sends comes with a cost, and across thousands of parcels, freight loads and carrier invoices, those costs add up fast. Transportation spend management brings structure to that complexity by reviewing every shipping charge, auditing it for accuracy and improving the terms that determine what you pay. FreightOptics takes this a step further with an AI-powered platform that automates parcel [FreightOptics freight audit and payment services](#) and freight auditing, strengthens carrier contracts and delivers connected spend intelligence. The result is lower total costs, fewer billing errors and a clear view of exactly where your logistics budget is going.

Turning Shipping Costs into a Strategic Advantage

FreightOptics is designed for businesses that ship at high volume, work with multiple carriers and deal with layered, complex pricing. The platform runs continuous checks, helps refine carrier contracts and gives you full visibility into your spending, transforming what is usually a costly headache into a genuine business asset. By pairing automated invoice review with AI-generated cost insights, it shows you where money is slipping away and how to win it back.

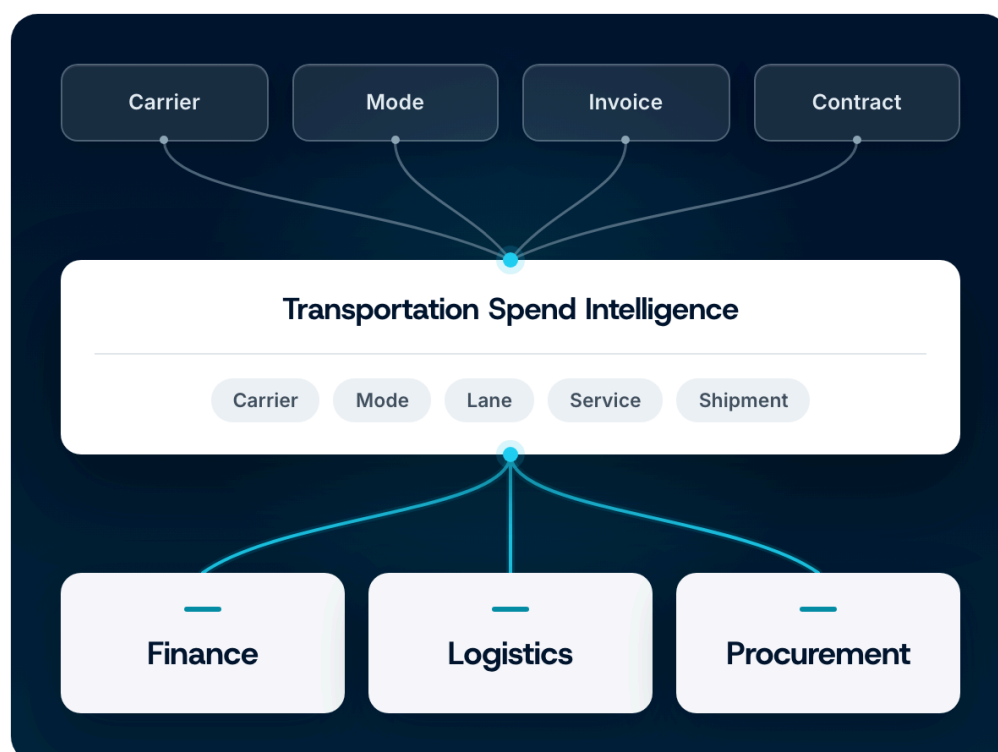

The Three Pillars of Transportation Spend Management

Audit and Payment

Every invoice is automatically checked for billing errors and duplicate charges. Any exceptions are flagged, tracked and linked back to the original document, so nothing falls through the cracks.

Carrier Contract Optimization

Using data-driven strategies and bid management, FreightOptics helps you negotiate better rates and more favorable terms across every mode of transport.

Transportation Spend Intelligence

Complex shipping data is translated into plain-language explanations, so it's easy to see what's driving your costs and decide what to do about it.

Why It Matters for Logistics Leaders

For companies moving large volumes of shipments, the potential savings are significant. FreightOptics gives you detailed insight into your cost drivers, supporting smarter decisions about budgeting, network design and carrier mix. That means lower landed costs, a faster return on investment and less time spent on manual audits, freeing your team to focus on strategic planning instead.

The Full FreightOptics Service Suite

- **Parcel Audit and Freight Audit and Payment:** Keep invoices accurate and payments on schedule.
- **Carrier Contract Optimization:** Secure stronger rates and better contract terms.
- **Transportation Spend Intelligence:** See all your shipping data in one clear, easy-to-understand view.
- **Freight Claim Management and a multi-mode TMS:** Add extra control over claims and shipment management.
- **Packaging optimization and duty drawback:** Find additional ways to reduce overall spend.

What Sets FreightOptics Apart

- **Clear, AI-driven insights:** FreightOptics' AI, IRIS, turns complex data into insights anyone on your team can understand.
- **No upfront cost:** Pricing is based on the savings you achieve, which lowers your risk and speeds up time to value.
- **Built for large shippers:** The platform easily handles complex networks and high invoice volumes.
- **Nationwide reach:** A strong presence across the United States, backed by capabilities that scale with your business.

FreightOptics provides an integrated spend-management ecosystem for modern supply chains. By consolidating multi-modal shipping data into a single cloud platform, applying ML-driven contract modeling, and delivering proactive BI dashboards, it enables swift issue resolution, precise cost control, and sustained savings. With end-to-end support from onboarding to optimization, clients typically realize meaningful reductions in freight spend and a clear ROI for finance, procurement, and operations.
