Rock	Scissors	Gamer 1 Wins
Paper	Rock	Player 1 Wins
Paper	Paper	Connect
Paper	Scissors	Player 2 Wins

- **Exploitative Play:** If an opponent is deviating from GTO play-- such as tossing Paper frequently-- a wise bettor will counter by tossing Scissors at a higher frequency.
- **The "Waterfall" Strategy:** Start with Rock, transfer to Paper, and finish with Scissors in consecutive rounds. This creates a mental narrative that can puzzle challengers who are attempting to read patterns.
- **Announce Your Move:** Advanced mentalists will occasionally mention aloud what they plan to throw. Paradoxically, opponents frequently presume it's a bluff and choose the specific counter, enabling the speaker to catch them off guard by in fact tossing what they said they would.
