

Downspout extensions are a simple but often overlooked component of basement waterproofing, and JLB Basement Waterproofing & Foundation Repair LLC includes this assessment as part [Basement Waterproofing](#) of its Des Moines service. Downspouts that discharge water too close to the foundation can contribute directly to basement moisture problems, even when the rest of the waterproofing system is functioning well. JLB's team checks downspout placement and extension length during a comprehensive basement assessment, recommending adjustments where needed to direct water further from the foundation.

JLB Basement Waterproofing & Foundation Repair LLC | 97 Indiana Ave Suite #1, Des Moines, IA 50314 | (515) 717-8560

This relatively simple fix can meaningfully reduce water pressure against basement walls when combined with the company's more comprehensive interior drainage solutions. For basement waterproofing including downspout assessment in Des Moines IA, contact JLB Basement Waterproofing & Foundation Repair LLC at (515) 717-8560.
