Avia Masters is an online gambling establishment game that falls under the broader classification of instant-win and multiplier-based gambling. The main premise is simple: gamers position a bet, see an aircraft take flight, and watch a multiplier value increase in real-time. The goal is to cash out before the flight ends or crashes. If the gamer squanders effectively, they win their preliminary bet increased by the existing value. If the flight ends before they hit the cash-out button, the stake is lost.

Many platforms provide a dual-betting feature, enabling gamers to position 2 separate wagers on the precise very same round with various cash-out targets.

2. Takeoff and Multiplier Rise

When the betting window closes, the aircraft launches. As it climbs up into the virtual sky, a multiplier counter starts ticking upward from £ 1.00 \ times £. The climb can be smooth, or it can include abrupt velocity, producing

tension as players weigh the threat of waiting a little bit longer against the reward of a higher payout.

3. The Cash-Out

This is the core of the game. At any moment during the flight, the player can strike the "Cash Out" button. The payout is computed quickly based on the multiplier at the specific millisecond of the click.

Round Phase Player Action Prospective Outcome **Betting Window** Location single or dual wagers Setup for the upcoming round **Ascent (Low Multiplier)** Monitor the rising counter (£ 1.1 \ times - 2 \ times £) Safe cash-out, smaller sized profit **Ascent (High Multiplier)** Risk management/ waiting High reward, but increased threat of round ending **End of Round** Money out effectively OR flight ends Win protected OR stake surrendered
