What Is the Mines Game?

Mines is a *instant-win* casino game where the gamer exists with a grid (normally 5×5 or 5×6). Covert beneath a few of the squares are "mines." The goal is to expose safe squares without striking a mine. Each safe square you reveal increases a multiplier that applies to your original stake. At any point you may *cash out* and gather the present multiplier. If a mine is exposed, the round ends and the stake is lost.

The game is deterministic in the sense that the number of mines is fixed before the round begins (normally 1 to 5 mines), and the payment for each safe reveal is mathematically linked to that number. Since the result is based on a random number generator (RNG), the outcome is reasonable offered the operator utilizes a licensed RNG.

How to Play-- Step-by-Step

1. **Select a Stake**-- Select the quantity you want to wager. Many platforms enable bets varying from a few cents up to several hundred dollars, depending on the operator's limitations.
2. **Select the Number of Mines**-- Decide the number of mines will be hidden in the grid. The more mines you pick, the higher the possible multiplier, but the risk of striking a mine grows appropriately.
3. **Expose Squares**-- Click on any square to reveal it. A safe square shows a numeric value that adds to the running multiplier.
4. **Squander or Continue**-- After each expose, you might either cash out and protect the built up multiplier or continue clicking to increase it further.
5. **Game Over**-- If you uncover a mine, the round ends quickly and the wager is forfeited. If you squander, the multiplier is used to your original stake and the earnings are credited to your account.
