What is the Aviator Game?

At its core, Aviator is a social multiplayer crash game. The central theme focuses on an increasing multiplier curve that can "crash" at any moment.

When a round starts, a red plane takes off, and a multiplier coefficient starts increasing rapidly from **1.00 x**. The objective is deceptively simple: gamers need to cash out their winnings before the airplane flies away. If a player squanders successfully, their bet is multiplied by the coefficient at the time of the cash-out. Nevertheless, if the aircraft flies away before they squander, the bet is lost.

3. **Squander:** Players need to monitor the rising multiplier and click the **"Cash Out"** button before the airplane vanishes off the screen.

Popular Strategies Used by Players

While Aviator is fundamentally a game of chance determined by a Random Number Generator (RNG), players typically utilize various bankroll management techniques to structure their gaming sessions.

- **Bet 2:** Managed by hand, focused on capturing a higher multiplier (e.g., 5x or 10x) for an earnings increase.

2. The Conservative Approach (Low Multiplier Hunting)

This strategy includes cashing out regularly at really low multipliers (1.20 x - 1.30 x). While the individual wins are little, the statistical probability of the plane crashing *before* 1.20 x is fairly lower, causing a higher win frequency. Nevertheless, a single crash before the target can eliminate a number of previous gains.

3. The Martingale Strategy (High Risk)

Adapted from roulette, this method includes doubling the bet size after every loss so that a single win recuperates all previous losses plus a profit.

- *Warning:* This method requires a huge bankroll and can quickly hit table limitations or deplete funds throughout a long losing streak.
