What is Crash Gambling?

At its core, crash gaming is a multiplayer, online wagering game focused around an intensifying multiplier. Gamers place a bet, and as the round starts, a multiplier curve begins to rise-- beginning at 1.00 x and in theory climbing considerably.

The goal is basic: **money out before the video game arbitrarily "crashes."**

If a gamer effectively squanders at 2.50 x, they double their wager (minus a tiny home edge). However, if the game crashes before they cash out, they lose their entire bet for that round. The twist is that crashes can occur at any millisecond-- sometimes instantly at 1.00 x, and other times skyrocketing past 100x or perhaps 1,000 x.

A Typical Round: Step-by-Step

2. **The Lift-Off:** The round starts. A rocket, line, or graphical multiplier begins to ascend from 1.00 x up.
3. **The Decision:** Players watch the multiplier climb in real time, making a split-second choice to click "Cash Out" to secure their existing revenue.
4. **The Crash:** Suddenly, the video game stops. A "Crashed at X.XX" message appears. Anybody who had not squandered loses.
