By the end, you'll have a clear understanding of why our business, Glazing 101, is your best choice for all your glazing needs.

What is Glazing?

Glazing refers to the installation of glass in windows or doors. It is a critical part of any structure, supplying natural light, thermal insulation, soundproofing, and aesthetic appeals. The ideal option of glazing can dramatically impact energy effectiveness and owner comfort.

Kinds of Glazing.

1. Single Glazing: Single glazing contains a solitary pane of glass. While it is the most basic type of glazing, it offers very little insulation, making it much less energy-efficient contrasted to various other options.

2. Double Glazing: Dual glazing includes two glass panes divided by an air or gas-filled space. This design provides much better insulation, reducing warm transfer via windows and lowering power prices.

3. Three-way Glazing: Three-way glazing contains 3 glass panes with multiple air or gas-filled spaces. It offers premium insulation and soundproofing compared to single or double glazing, making it an exceptional option for buildings in noisy or severe climate condition.
