What is Crash Gambling?

At its core, crash gaming is a multiplayer, online betting video game focused around an escalating multiplier. Players place a bet, and as the round begins, a multiplier curve starts to rise-- starting at 1.00 x and in theory climbing up considerably.

The goal is easy: **squander before the game arbitrarily "crashes."**

If a player successfully cashes out at 2.50 x, they double their wager (minus a tiny house edge). Nevertheless, if the game crashes before they cash out, they lose their whole bet for that round. The twist is that crashes can occur at any millisecond-- in some cases instantly at 1.00 x, and other times soaring past 100x or perhaps 1,000 x.

A Typical Round: Step-by-Step

1. **The Betting Window:** Players have a quick window (generally 5 to 10 seconds) to place a couple of bets for the upcoming round.
2. **The Lift-Off:** The round starts. A rocket, line, or graphical multiplier begins to ascend from 1.00 x upward.
3. **The Decision:** Players view the multiplier climb in real time, making a split-second decision to click "Cash Out" to secure their existing profit.
4. **The Crash:** Suddenly, the video game stops. A "Crashed at X.XX" message appears. Anybody who hadn't squandered loses.
