How a Standard Case Battle Works:

1. **Lobby Creation:** A gamer creates a battle room, choosing a particular set of cases to be opened and the variety of participants (normally 2, 3, or 4 gamers, or 2v2 group formats).
2. **Purchasing In:** All participants pay an entry cost equal to the combined value of the picked cases.
3. **The Opening:** Players open the very same sequence of cases all at once. Animations play out, exposing the dropped items round by round.
4. **Figuring out the Winner:** At the end of the battle, the total monetary worth of all products dropped for each gamer is computed. **The gamer with the highest overall item value wins the entire pool of skins.**

Battle Type Description Threat Level Potential Reward **1v1 (Standard)** Head-to-head battle versus a single opponent. Moderate 2x preliminary buy-in **Free-For-All (FFA)** 3 or 4 gamers battle separately; highest overall wins all. High 3x to 4x preliminary buy-in **2v2 Team Battle** Two teams of two; combined group value identifies the winner. Balanced 2x split amongst the winning team **Terminal/ Crazy Mode** The player with the *most affordable* total worth wins the pot. Extreme Variable

- **Play 1v1 Instead of FFA:** In a 4-player Free-For-All, your mathematical possibility of winning is only 25%. In a 1v1 battle, your baseline win probability is 50%. Stay with head-to-head matches to keep the odds as near to even as possible.

4. Understand "Crazy Mode" and Alternative Rules

Many sites provide alternative video game modes, such as "Terminal Mode" or "Reverse Battles," where the person who unboxes the *least expensive* overall value wins.
