What is the Limbo Crypto Game?

At its core, Limbo is a streamlined, high-speed crash-style betting game. Inspired by the traditional carnival game of the very same name (where players see how low they can go), crypto Limbo is everything about how high a multiplier can climb up.

In the game, a player places a wager and picks a **target multiplier** (e.g., 2.0 x, 10x, and even 1,000 x). The game's algorithm then creates a random multiplier outcome. If the created result amounts to or greater than the player's selected target, the bet wins. If the outcome falls short, the bet is lost.

Its minimalist style-- typically featuring just a couple of input boxes, a giant multiplier display, and a roll button-- makes it a favorite for gamers who choose hectic action without visual mess.
