A few questions are worth asking any contractor:

- What low-E package are you recommending for this exposure?
- How does the window perform on U-factor and SHGC?
- Will the installation be full-frame or insert, and why?
- What warranty covers the glass seal and the workmanship?
- Are you familiar with Rowlett TX building permit requirements for window and door replacement? Those questions help separate a polished sales presentation from a plan that actually fits the house.

Low-E Rowlett window replacement windows are a smart upgrade in Rowlett because they address the heat where it starts, at the glass. They are not magic, and they will not fix every comfort problem in an older house.
