Diving Into the Four Bonus Rounds

The real heart of Crazy Time depends on its 4 bonus offer video games. Triggering among these rounds transports gamers from the primary studio into a distinct increased reality mini-game.

1. Coin Flip

The simplest of the perk rounds. A coin with a red side and a blue side is turned by a mechanical arm.

- Before the flip, random multipliers are appointed to both the red and blue sides.
- Whichever side lands face up wins the multiplier for the taking part players.
- If the multipliers are low, a "Rescue Flip" can in some cases be activated, giving players another possibility at greater benefits.

2. Money Hunt

This reward game features an enormous screen showing 108 random multipliers hidden behind shooting gallery signs (like a cactus, a target, or a duck).

- Players use an on-screen crosshair to aim and shoot at one symbol before the timer runs out.
- Once time ends, all symbols expose their hidden multipliers, and the player receives the multiplier behind their picked target. Every gamer gets to choose their own area, implying various gamers can win different amounts.

3. Pachinko

Motivated by the traditional Japanese arcade game, Pachinko includes a glowing, vertical board filled with physical pegs.

- The host drops a puck from the top of the board.
- The puck bounces arbitrarily down through the pegs until it lands in among the multiplier zones at the bottom.
- If the puck lands on a "**Double**" worth, all multipliers at the bottom of the board double, and the puck is dropped again, resulting in possibly huge payouts.

4. Crazy Time

The supreme reward round takes players behind a red door into a surreal, whimsical virtual world including a huge, 64-segment wheel.

- Gamers must select among 3 flappers: **Green, Blue, or Yellow**.
- The host spins the huge wheel.
- Whichever segment the selected flapper points to when the wheel stops is the reward granted.
- The wheel includes "**Double**" and "**Triple**" sections. If a flapper lands on one of these, all multipliers on the wheel double or triple, and the wheel is spun once again. This is where the video game's famous 20,000 x max multiplier can be achieved.
