What is a CS: GO Case Battle?

At its core, a case battle is a competitive multiplayer unboxing format hosted on third-party CS: GO betting and trading platforms. Instead of a single gamer opening a case in isolation, multiple gamers (typically between 2 and four) pool their resources to open the specific very same set of cases all at once.

The mechanics are simple yet awesome:

1. **The Buy-in:** All participants contribute a set amount of money to purchase an established choice of cases.
2. **The Drop:** The cases open automatically in rounds, revealing random weapon skins for each player.
3. **The Score:** The total worth of all the skins dropped for each gamer is calculated at the end of the battle.
4. **The Winner:** The gamer (or group) with the greatest cumulative skin worth takes home *all* the drops from every individual.

If somebody drops a knife worth £ 500, and the overall value of their drops goes beyond everybody else's, they win the entire pot-- including the opponent's skins.
