

Fixed braces remain a reliable option at Whites Dental Marble Arch for patients needing more significant tooth movement than clear aligners like Invisalign can typically achieve. The practice offers several types of fixed braces, including ceramic and Damon braces, giving patients options that balance effectiveness with aesthetic considerations during treatment. Dentists at the practice assess each patient's specific alignment needs to recommend the most suitable type of brace, whether that means traditional metal, ceramic or a self ligating Damon system.

Whites Dental Marble Arch (W2) | 52B Kendal St, St George's Fields, London <https://speakerdeck.com/meluneitcc>
