What Is CS2 Unboxing?

Unboxing in CS2 is the process of opening a *case* (formerly referred to as a "container" in CS: GO) which contains a random skin. Each case requires a matching **secret** to open, which can be bought from the in-game store or the Steam Community Market. The result is figured out by a set of likelihoods defined by Valve, ensuring that every unboxing is mathematically reasonable but statistically unpredictable.

The Core Workflow

1. **Purchase or acquire a case**-- Cases can be made by playing the game, leveling up, or purchasing them from the market.
2. **Purchase an essential**-- Keys are tied to the case type; for example, the "Revolver Case" requires a "Revolver Key."
3. **Open the case**-- Click "Open" in the stock UI; the animation reveals a random skin.
4. **Result handling**-- The skin can be kept, utilized, or sold on the Steam Market or third-party trading platforms.

Comprehending the Odds: Drop Rates

The probability of getting a particular rarity tier is fixed by the game's internal algorithm. Below is a streamlined overview of the common drop distribution for a basic CS2 case. (Values are approximate and may vary somewhat between cases.)

Rarity Tier	Approximate Drop Chance	Customer (Blue)	~ 80%	Mil-Spec (Purple)	~ 15%	Restricted (Pink)	~ 4%	Classified (Red)	~ 0.65%	Covert (Gold)	~ 0.25%	Rare Special Item (Knife/ Gloves)	~ 0.03%
-------------	-------------------------	-----------------	-------	-------------------	-------	-------------------	------	------------------	---------	---------------	---------	-----------------------------------	---------
