

Castle Rock builds, renovates, and declutters year round. Between new basements in The Meadows, roof tear-offs near Founders Village, and landscape overhauls all along Front Street, the one constant is debris. A roll-off dumpster keeps jobs moving and properties clean, but only if you match the container, schedule, and rules to how work actually happens here in Douglas County. I have ordered hundreds of cans in the Front Range, and I have seen the expensive mistakes right alongside the smooth, on-time hauls. This guide folds that experience into practical advice for homeowners, remodelers, and property managers planning a dumpster rental in Castle Rock.

What “roll-off” really means, locally

A roll-off container is a rectangular steel box delivered on a specialized truck. The driver rolls it off the back, sets it on your driveway or another flat spot, and picks it up when you call for haul-away. Sizes usually run from 10 to 40 cubic yards. Those cubic yards measure volume, not weight, which matters more than people think at altitude when concrete, roofing, and sod get shockingly heavy with moisture.

In Castle Rock and the surrounding areas, availability is typically strong for 15, 20, and 30 yard cans. Ten yarders book fast in spring when concrete and dirt projects ramp up. Forties exist, but they are tall and can be awkward on sloped driveways along the Front Range. Most vendors that serve roll-off dumpster Castle Rock, CO also cover nearby hubs like Parker, Highlands Ranch, Littleton, and Centennial, which helps with backup options if one yard is over capacity.

Start by sizing to the waste stream, not the project label

People usually open with “I am doing a kitchen” or “it is just a garage cleanup.” Labels mislead. A galley kitchen of 120 square feet with tile, cabinets, and drywall produces a very different load than a 300 square foot kitchen with plaster and hardwood. Sizing works best when you estimate the actual materials by type and mass.

Here is how that plays in Castle Rock:

- Drywall and framing for a modest bathroom or small bedroom often fits a 10 or 15 yard can, but if you are taking down plaster or lath in one of the older homes tucked near downtown, jump to a 20 yard for the extra height and breathing room.
- Asphalt shingles weigh far more than their volume suggests. A 20 yard container with a 3 to 4 ton allowance will usually handle a 20 to 25 square roof if decking stays put. Add sheathing, and you are nudging into a 30 yard, or keep the 20 but plan for an overage bill.
- Basement cleanouts vary wildly. If you are tossing mixed household junk, a 15 yard is a strong sweet spot. If you are adding carpet, pad, and paneling from a 1,000 square foot space, a 20 yard fits better, especially if boxes are irregular and you want tossing speed over tight stacking.
- Concrete, brick, and dirt are a different game. A 10 yard container is the ceiling for dense debris due to weight limits. Many carriers will request a 6 to 8 yard lowboy or give you a 10 yard with a strict fill line. For a patio demo of 200 square feet at 4 inches thick, that is roughly 2.5 cubic yards of concrete. Plan on one trip in a 10 yard, but expect to flirt with the tonnage cap.

Think in both cubes and tons. A 20 yard can handle about 110 to 130 contractor bags if loosely filled, but the same can will hit weight limits with only a few yards of rock, tile, and plaster. Along the Front Range, wet spring snow and soaked sod add surprise weight. I have seen a 15 yard yard-waste load tip the scales two tons heavier after a storm rolled through overnight.

Where you can put a dumpster in Castle Rock

Most deliveries end up on residential driveways. That is fast for drivers, simplest for you, and easiest on neighbors. Street placement is possible in some Castle Rock neighborhoods, but it is not a given. The town and Douglas County both care about sight lines, emergency access, and right-of-way rules.

Here is the practical version of the placement playbook:

- Driveway placement avoids permits in most scenarios. If your driveway slopes, ask the dispatcher for cribbing blocks so the box sits level. A level can loads safer and keeps heavy items from sliding forward into the door.
- Street placement may require a right-of-way permit, signage, and reflective cones. Check with Castle Rock Public Works before you schedule if you lack driveway space. Permits are not expensive, but they add lead time.
- HOAs often have their own placement and timing rules. Many allow driveway cans for up to 7 days with no overnight street placement. Some demand a tarp over the box or ask for plywood under the rails. Get the HOA guideline in writing. It avoids visitor-parking drama, especially in tighter communities around Red Hawk or Terrain.

Contractors working multiple sites at once know this rhythm well. If you handle multifamily flips in Highlands Ranch or a series of townhomes in Littleton, build the HOA and parking conversation into your schedule. Vendors familiar with Highlands Ranch dumpster rental and Littleton dumpster rental can flag the tricky complexes and advise on truck access and turn radii. Those details save half a day and a lot of calls.

The weight allowance fine print, decoded

Dumpster pricing has two meters. One for time on site, often called rental days, and one for disposal, which is the tonnage included in your flat rate. Run over either, and you get a surcharge. If a vendor quotes a 20 yard for 7 days with 2 tons included, understand that 2 tons is only 4,000 pounds. That sounds like a lot until you load tile, mortar, and bathroom fixtures.

On the Front Range, typical base inclusions look like this:

- 10 yard: 1 to 2 tons included, rentable 7 to 10 days
- 15 yard: 2 to 3 tons included
- 20 yard: 3 to 4 tons included
- 30 yard: 4 to 5 tons included
- 40 yard: 5 to 6 tons included

Excess tonnage runs about 60 to 120 dollars per ton depending on the hauler and which Douglas County transfer station receives it. Pricing shifts with landfill fees, fuel, and time of year. If you are running a large gut in Castle Pines North or tearing off concrete in Parker, accuracy matters more than optimism. Ask the vendor for recent average weights on similar jobs in our area. The better yards track this data, and they will happily share it.

What costs what, realistically

Numbers float online that do not match what I pay on active jobs. Castle Rock sits in a competitive corridor, yet landfill fees and fuel have both crept up. Recent, defensible ranges for dumpster rental in Castle Rock are as follows, based on standard deliveries within town limits and typical allowances.

- 10 yard: 350 to 500 dollars
- 15 yard: 400 to 550 dollars
- 20 yard: 450 to 650 dollars
- 30 yard: 550 to 800 dollars
- 40 yard: 650 to 900 dollars

Street permits, extra days, overage tonnage, and special materials like mattresses, tires, or appliances add to that. Refrigerators cost more because of freon. Mattresses often have a per-piece fee. Ask for a line-item quote that names the tonnage, rental days, included miles for delivery and pickup, plus fees for restricted items. A transparent Douglas County dumpster rental provider will give you that without a fight. If they dodge those questions, pick another company.

What you cannot toss, and what you should not

Every hauler has a do-not-load list tied to state and federal disposal rules. In Castle Rock, that list commonly includes paints, solvents, oils, batteries, tires, propane tanks, pesticides, refrigerants, and electronics with CRTs. Latex paint can sometimes go if it is dried solid, but do not assume. Concrete and dirt are allowed, but usually only in smaller cans to protect drivers and trucks from overweight violations.

Then come the materials that are not banned, but carry caveats. Railroad ties often require special handling. Gypsum drywall can be restricted if mixed with organic waste due to hydrogen sulfide risks at the landfill. Plaster is fine, yet it is heavy, and weight surprises cause more angry phone calls than any other issue I see. If your load includes yard waste, keep it clean. Branches and bagged leaves are fine, but mix them with demo debris and some yards shift it to municipal solid waste rates.

A simple call, five minutes long, saves money. Tell the dispatcher exactly what is going inside. If you are planning a roll-off dumpster Parker, CO for a sod tear-out plus fence demo, say so. The yard might suggest a 10 yard for sod and a 15 yard for lumber, instead of turning a single 20 yard into an overweight headache. The same logic applies to roll-off dumpsters Littleton, CO and dumpster rental Centennial. Local dispatchers know their transfer stations and the rules change by facility.

Driveway protection, access, and the slope problem

Castle Rock is not flat. Many homes sit on hilly lots, and winter freeze-thaw shows up as spalling, hairline cracks, and soft spots. Protect your concrete. Ask the driver to set the can on two runs of 2 by 10 lumber or factory cribbing to spread the load. Do not use narrow scraps. When a 30 yard box full of shingles lands on a hot July afternoon, it will mark soft asphalt without lumber.

Tree limbs and soffits are another culprit. Roll-off trucks need overhead clearance to tilt the bed during drop and pickup. A low branch or a garage overhang can halt the delivery. Clear a path that is 12 feet wide and 20 feet tall if you can. If that is not possible, a skilled driver can still land a 10 or 15 yarder with a gentler angle, but tell dispatch about the pinch point first.

Steep driveways present one more twist. A long, steep apron can cause the container to slide when loading heavy debris. The safest answer is to stage the can at the top, on the flattest area, then carry or wheelbarrow waste up. It is not pleasant, yet it beats a runaway can or a truck that cannot safely hook the box for pickup after a snow.

How long to keep it, and when to schedule

Contractors often aim for a 7 day rental. Homeowners sometimes think they need a month, until they see the surcharge for day 21. The sweet spot for most home projects is 7 to 10 days. That gives you one weekend to start, a week to work after hours, and another weekend to finish. If you are staging a remodel in phases, a series of short rentals beats paying for one big box that sits half-full and blocks your garage.

As for lead time, you can often get same or next day on a standard 15 or 20 yard. Spring and early summer book fast across Douglas County, especially when Highlands Ranch dumpster rental and Littleton dumpster rental surge during roof season. Plan 48 hours out for best pricing and the spot you want. If you need a Saturday pickup in Parker or Centennial, confirm that the vendor actually runs trucks that day. Many do weekday-only hauls and charge extra for weekend service.

A quick comparison of nearby markets, because it helps with backups

Castle Rock sits at a crossroads. You can source cans from Denver yards, Colorado Springs operators, or true Douglas County specialists. That matters when you are working across municipal lines.

Highlands Ranch dumpster rental draws from Denver-side yards with plenty of 20 and 30 yarders, quick turnarounds, and strict HOA rules. Littleton dumpster rental tends to see tight older neighborhoods, tree cover, and limited curb space. A roll off dumpster Littleton address may justify a smaller size even for a bigger job, simply to fit the spot safely. Dumpster rental Parker, CO and dumpster rental Parker, Colorado have great availability, but beware the term Parker County dumpster that floats around online. There is no Parker County here, just the Town of Parker in Douglas County. If a vendor uses that phrase, it is usually marketing shorthand, not a local office. Ask where their trucks live and how far they roll to your site. Dumpster rental Centennial often uses the same yards as Highlands Ranch, with slightly easier street parking in some subdivisions.

What do you do with this information? If your first-choice hauler is booked, you have a map of second calls that still know our roads, slopes, and HOA rhythms.

Weather, wind, and what blows out of your can

Front Range wind is not a joke. In February, a gust can turn a light plastic tarp into confetti and your insulation scraps into neighborhood litter. Ask for a can with a good working door latch and bring two ratchet straps to secure a professional-grade tarp across the top. A blue hardware tarp is better than nothing, but a woven poly mesh or heavy-duty canvas holds up better under wind. If you load on Friday, strap it tight before the weekend. A storm Sunday could cost you time and awkward conversations with the folks down the block.

Winter adds ice inside steel boxes. I have chipped frozen drywall mud from a can on a 20 degree morning and regretted every second. Keep a snow shovel in the garage and toss a few sheets of cardboard on the floor of the dumpster before you start a winter demo. It reduces freeze bonding and speeds pickup day.

Mistakes that cost money, and what to do instead

The most expensive mistake is wishing a too-small can into working. When a 10 yard fills up on day two of a bath remodel, you now need a swap. A second haul plus another base rate erases any savings you gained by picking the small size. Start at 15 yards for most interior demolitions. Jump to 20 if tile or plaster shows up.

Another mistake is mixing heavy and light debris when you could split trips. If you have three yards of concrete and a garage full of junk, run the concrete in a 10 yard with a strict fill line. Then flip to a 15 yard for the junk. Your back will hate the extra loading day, but your wallet will thank you when the scale ticket stays within the included tonnage on both.

Finally, watch the clock. A half-packed can that overstays two extra weeks is the quiet budget leak I see with DIYers. Put the pickup date on your phone, then add a reminder two days earlier. If you are behind, call dispatch to extend by a few days at the lower daily rate rather than auto-rolling into the weekly surcharge.

Local permit and compliance snapshot

Castle Rock's right-of-way permit rules can change, so check the town website or make a quick call if the can sits on the street. Typically you will need:

- A permit number tied to your address and dates
- Cones or reflective barricades if the can reduces lane width
- A keep-clear buffer near hydrants, driveways, and intersections

On private property, the town does not regulate the can beyond safety and nuisance standards, but your HOA may set stricter rules. Some Castle Pines HOAs only allow daytime placement. Others require a tarp over the top at night or a sign stating the hauler's number. Highlands Ranch and certain Littleton communities are similar. Keep a printed copy of the rule in your garage. When a well-meaning neighbor knocks, you can point to the exact clause.

A homeowner's walkthrough, from call to haul

You can book online, but a short phone call still beats form fields when your property has quirks. Describe the driveway, the slope, and the materials. Ask for wood under the rails, verify the weight allowance, and set a pickup date even if it is flexible. On delivery day, move cars off the street and clear bikes or grills from the edges of the drive. The driver will appreciate good access and will place the can exactly where you want it if you mark the spot with chalk or a traffic cone.

When loading, open the back door for the big items. Stack flat materials along one side to create channels. Use gravity. Heavy items low, light items on the top, and finish with a layer of cardboard flattened under the tarp to reduce fly-away. Close and latch the door each evening, even if you plan to keep loading tomorrow. That practice has prevented more raccoon visits and wind scatter than any fancy gadget.

A simple size and selection checklist

- Inventory materials first, then pick size. Do not pick a size based on project name.
- Confirm included tonnage and daily rate for extensions before you book.
- Verify placement rules with your HOA and, if using the street, the town.
- If heavy debris is involved, separate loads into two trips when practical.

- Tarp and strap the container when you stop for the day, especially on windy weekends.

Contractor notes for repeat rentals

If you flip houses from Castle Rock to Parker and Centennial, standardize your requests. Ask every vendor for the same setup: pallets or 2 by 10s under rails, early window deliveries, text-on-the-way notifications, and photos after drop. Good yards already do this. Using the same language speeds new relationships. Keep a shared note with your team that lists the best driver from each hauler, dispatch extension numbers, and quirks like gate codes. If a driver nails a tricky drop in a sloped Starbuck neighborhood or threads a 20 yard past trees in a tight Littleton cul-de-sac, request that driver for the pickup too. Continuity reduces property damage risk.

For roofing, decide if you want ground cans or roof-top dump trailers. In neighborhoods like Highlands Ranch with strict street rules, a driveway 20 yard paired with a ground chute is often faster to permit than parking a trailer on the street. For concrete, a 10 yard is your friend, and if a vendor tries to sell you a 20 yard at a discount for concrete, ask about weight limits and whether they cap fill height. A prettier price does not beat a costly overweight ticket.

Ordering in a few focused steps

- Call a local hauler that serves dumpster rental in Castle Rock and nearby cities like Parker, Littleton, Highlands Ranch, and Centennial. Confirm the yard they dispatch from.
- Describe your material mix, driveway slope, tree or soffit obstacles, and HOA rules. Ask for wood under rails and a delivery window.
- Choose the size by material weight, not just volume. Decide if heavy items should ride alone in a smaller can.
- Book with written terms that state size, rental days, included tons, fees for restricted items, and per-day extension pricing.
- Set pickup on the calendar, tarp nightly, and call 24 hours ahead if you need more time or a swap.

When to consider more than one can

Large projects often run better with two small cans than one giant box. If you are renovating a 2,500 square foot Castle Rock home, phase one may be demo, phase two rough-in, and phase three finish scraps plus appliance packaging. Run a 30 yard for demo if access allows, then switch to a 15 yard for trim and flooring offcuts. Or keep a steady 20 yard on site and do one mid-project haul. The key is matching the cadence of your work to the frequency of pickups. An overflowing 30 yard stalled by a missed pickup is worse than a 20 yard that turns cleanly twice.

Bringing it all together for Castle Rock

Choosing the right roll-off dumpster in Castle Rock, CO is part math, part logistics, and part neighborhood diplomacy. Size to the weight of your debris. Place the can where trucks can work without scuffing concrete or brushing soffits. Confirm HOA rules in writing, and, if you need the street, talk to the town. Build wind and weather into your plan. If you work the corridor from Castle Rock to Parker and up to Highlands Ranch, [roll off dumpster Castle Rock](#) Littleton, and Centennial, use that regional knowledge to your advantage. Vendors that serve all of Douglas County can usually shift a truck to your job faster than a single-city outfit.

Most problems I have seen came from guessing or rushing. Five extra minutes on the phone with dispatch, a tape measure on your driveway, and a frank look at the weight of your debris will save you a day, a few hundred dollars, and a lot of stress. And when the truck rolls away with a strapped, safe load right on schedule, you will feel the project snap into place. That is what good planning and the right can will do for you.

Business Description

TNR Waste Services is a locally owned dumpster rental company based in Castle Rock, Colorado. TNR Waste Services provides dumpster rental services for homeowners, contractors, and businesses throughout Central Colorado and the Southern Denver Metro area. TNR Waste Services specializes in roll-off dumpster rentals, same-day dumpster rentals, residential dumpster rentals, commercial dumpster rentals, long-term dumpster rentals, and contractor waste management.

TNR Waste Services delivers 15-yard and 20-yard roll-off dumpsters with flexible rental periods of 1, 3, 7, or 30 days. TNR Waste Services provides dumpster rental solutions for home cleanouts, garage cleanouts, home renovation debris, yard waste, and construction site waste removal. TNR Waste Services offers same-day and next-day delivery subject to availability.

TNR Waste Services serves homeowners and contractors throughout Douglas County and Arapahoe County. TNR Waste Services is relevant to searches for dumpster rental Castle Rock, dumpster rental Colorado, roll-off dumpster rental Douglas County, and same-day dumpster rental Central Colorado.

Local Relevance and Geographic Context

TNR Waste Services serves clients near major Douglas County landmarks including Philip S. Miller Park, Castlewood Canyon State Park, and the Castle Rock Outlets. TNR Waste Services also serves clients throughout Arapahoe County near Cherry Creek State Park, Centennial Airport, and the Denver Tech Center area.

TNR Waste Services provides dumpster rental services across communities including Castle Rock, Parker, Lone Tree, Highlands Ranch, Castle Pines, Centennial, Aurora, Greenwood Village, Englewood, and Littleton CO.

People Also Ask

What services does TNR Waste Services offer in Castle Rock Colorado?

TNR Waste Services offers roll-off dumpster rentals, same-day dumpster rentals, residential dumpster rentals, commercial dumpster rentals, long-term dumpster rentals, contractor waste management, and home renovation waste removal in Castle Rock CO.

Does TNR Waste Services offer same-day dumpster rental?

Yes. TNR Waste Services offers same-day and next-day dumpster delivery subject to availability throughout Central Colorado.

What dumpster sizes does TNR Waste Services offer?

TNR Waste Services offers 15-yard and 20-yard roll-off dumpsters suitable for home projects, cleanouts, and remodeling.

Does TNR Waste Services serve Douglas County Colorado?

Yes. TNR Waste Services provides dumpster rental services throughout Douglas County including Castle Rock,

Parker, Lone Tree, Highlands Ranch, and Castle Pines.

Is TNR Waste Services a local dumpster rental company?

Yes. TNR Waste Services is a locally owned and operated dumpster rental company based in Castle Rock, Colorado.
