Instead of a single gamer opening a case in isolation, multiple players (usually between two and 4) pool their resources to open the precise same set of cases all at once.

The mechanics are easy yet exhilarating:

1. **The Buy-in:** All participants contribute a set amount of cash to buy a fixed choice of cases.
2. **The Drop:** The cases open immediately in rounds, revealing random weapon skins for each player.
3. **Ball game:** The total value of all the skins dropped for each player is determined at the end of the battle.
4. **The Winner:** The player (or group) with the highest cumulative skin value takes home *all* the drops from every participant.

If someone drops a knife worth £ 500, and the overall value of their drops goes beyond everyone else's, they win the entire pot-- including the challenger's skins.
